

Harvest Q – Future Features & Vision

1. Trade Mode

- **Why:** Not all value is measured in cash. Farmers and consumers often have surplus items that can be bartered.
 - **How:** A toggle option in listings:
 -  For Sale
 -  Willing to Trade
 - **Example:**

“10 lbs of cucumbers — open to trading for eggs, honey, or compost.”
 - **Benefit:** Encourages community-driven exchange, lowers cash barriers, and reduces waste.
-

2. Community Philosophy Statement

“We believe in value that goes beyond currency — where real relationships and resources are exchanged, not just dollars. Real value creates real value.”

- Establishes Harvest Q as a **cooperative-style ecosystem**, not just a marketplace.
 - Builds trust among users, strengthening local farmer–consumer bonds.
 - Sets the tone for expansion into co-op models, community-supported agriculture, and mutual aid exchanges.
-

3. Long-Term Roadmap Concepts

-  **Local Co-op Partnerships:** Farmers pooling products for joint sales.
 -  **Micro-Financing Integration:** Give farmers access to small, app-based loans.
 -  **Geo-Fenced Community Alerts:** Notify buyers when fresh produce is available nearby.
 -  **Sustainability Badges:** Recognition for eco-friendly practices.
-

 *Note for judges:* These features are not part of the MVP but shape the **future identity** of Harvest Q. They show how we’re designing for resilience, community, and fairness.
